THE ORGANIC GROWTH 2.0 PLAYBOOK

Your website is one node. AI reads the map.

A surface-by-surface playbook for getting **recommended by ChatGPT, Perplexity, Claude and Google's AI**, built on 1,000 queries of our own research.

8 surfaces · 5 step loop · 90 day plan · 1,000 queries of data

SLATE AUTOMATES Slate runs it, you approve

SLATE ASSISTS Slate does the legwork, you lead

YOUR TEAM Keep this human

Shiyam Sunder · CEO, Slate

ORGANIC 1.0 → 2.0

Ranking your pages was the game. Getting named in the answer is the new one.

	ORGANIC 1.0	ORGANIC 2.0
THE GOAL	Rank your pages	Get your brand named in the answer
THE UNIT	Keywords	Prompts: the questions buyers ask AI
THE SURFACE	Your website	Your site + the 7 surfaces AI reads
THE SIGNAL	Position and clicks	Mentions, citations, share of answer
THE SHELF	10 blue links	A handful of vendors, different per engine
THE CADENCE	Monthly rank report	Always-on tracking, weekly fixes

1.0% of Google's top-10 pages **ever appeared in a ChatGPT answer** across our 1,000 queries. Ranking alone doesn't get you into the conversation.

Slate Citation Lab: 1,000 B2B SaaS queries via API with web search, captured 3 Aug 2026.

Shiyam Sunder · CEO, Slate

WHERE AI GETS ITS ANSWERS

AI doesn't read your site.
It reads the whole web around it.

Every grey node is somewhere a buyer's question can get answered **without your website.** Organic 2.0 is about showing up on those nodes too.

Shiyam Sunder · CEO, Slate

SLATE CITATION LAB · 1,000 B2B QUERIES

Every engine reads the map differently.

ENGINE	LINKS PER ANSWER	COMMUNITY & SOCIAL SHARE	CITES GOOGLE'S #1 RESULT	FAVOURS
Perplexity	19.1	10.7%	87%	Pricing pages · Reddit is its #1 domain
AI Overviews	9.4	10.4%	55%	Definition pages · cites pricing pages least
Claude	12.5	0.6%	35%	Longer, deeper, structured pages
ChatGPT	3.1	0.1%	1% OF TOP-10 PAGES EVER	Pricing pages: 33% of its links · links on 8% of top-funnel answers

74%

of cited pages sit **outside Google's top 10** and AI Overview. Most of the map is off your rank tracker.

0

Reddit citations from **ChatGPT and Claude** in 1,000 answers. Perplexity: 1,051.

35–42%

of named vendors are **shared between any two engines**, even when the pages differ.

The read: no single surface wins every engine. Win the mention, not just the page.

API with web search (gpt-5.4-mini, sonar-pro, claude-sonnet-4.6, gemini-2.5-flash), one run per query, 3 Aug 2026. API results, not the consumer apps.

Shiyam Sunder · CEO, Slate

HOW TO RUN IT

Five steps. Every week. Not a one-time project.

1

Map the prompts

100–300 real buyer questions across top, mid and bottom funnel. Track each engine weekly and log which sources it cites.

SLATE AUTOMATES

2

Fix your own node

Definition, comparison and pricing pages. Rank them first: it's the one lever every engine follows.

SLATE ASSISTS

3

Earn the other nodes

Get onto the roundups, review sites and threads the engines already cite for your category.

SLATE ASSISTS · YOUR TEAM

4

Refresh what decays

Pages losing rank or citations get updated with new data before a competitor takes the slot.

SLATE AUTOMATES

5

Prove it

Share of answer vs competitors, citations won and lost, AI-referred sessions per page. Weekly.

SLATE AUTOMATES

Run it weekly

MEASURE → FIX → EARN

SURFACE BY SURFACE · PART 1 OF 2

Start with the nodes every engine leans on.

YOUR SITE

The one node you control

definition · comparison · pricing · integration pages

Data: a third of ChatGPT's links went to pricing pages. Definition pages are top-two for Perplexity, Claude and AI Overviews.

→ Public, crawlable pricing with plan names in text

→ One clear definition page per category term

→ Honest "X vs Y" and "alternatives" pages

MEASURE pages cited per engine

AUDITS · SCHEMA · LINKS | BRIEFS · DRAFTS

SEARCH ENGINES

Rank still feeds the answer

Google · Bing · Brave · DuckDuckGo

Data: Perplexity cited the #1 result 87% of the time, falling to 46% at #9. Rank was the only lever that mattered.

→ Map each prompt to the query behind it

→ Fight for top 3 on bottom-funnel terms

→ Verify you're indexed in Bing, not just Google

MEASURE position on prompt-mapped queries

RANK TRACKING | GAP RESEARCH · CTR FIXES

REFERENCE, NEWS & ROUNDUPS

Be in what they quote

Wikipedia · Reuters · WIRED · Tom's Guide · "best X" lists

Data: 74% of cited pages weren't in Google's top 10 or AI Overview. Most of what AI quotes is off your rank tracker.

→ Find the roundups engines cite for your category

→ Pitch with proof: data, pricing, screenshots

→ Publish original research worth citing

MEASURE cited third-party pages that name you

FIND + PITCH ROUNDUPS | PRESS · WIKIPEDIA

COMMUNITIES & FORUMS

Huge for one engine. Zero for two.

Reddit · Quora · Stack Overflow

Data: Reddit was Perplexity's #1 cited domain. ChatGPT and Claude cited it 0 times in 1,000 answers.

→ Prioritise if Perplexity or AI Overviews matter

→ Answer real threads as a named person

→ Turn repeat questions into pages on your site

MEASURE threads mentioning you vs competitors

MENTION TRACKING | POSTING

SURFACE BY SURFACE · PART 2 OF 2

Then fill the gaps your buyers actually use.

REVIEW SITES

Proof in other people's words

G2 · Capterra · TrustRadius · Trustpilot

Why: buyers ask AI "is X any good?" and review sites are where that answer lives.

- → Ask for reviews right after a win, every month
- → Reply to every review, good and bad
- → Mine review themes for comparison pages

MEASURE review count, rating, recency

G2 THEME MINING · ASKING CUSTOMERS

VIDEO

Answer the question on camera

YouTube · TikTok · Vimeo

Why: "how do I..." questions get answered with walkthroughs. Transcripts make video readable.

- → Film the 10 questions sales hears most
- → Chapters, transcripts, descriptive titles
- → Turn every video into a written page

MEASURE videos covering your top prompts

VIDEO → BLOG · PRODUCTION

SOCIAL

Where your point of view spreads

LinkedIn · X · Instagram · Facebook

Why: treat social as distribution. Posts spread the research and point of view that engines do cite.

- → Founder and team posts with real data
- → Every study becomes 5–10 posts
- → Point people back to the citable page

MEASURE branded search and mentions

POST DRAFTS · REPURPOSING · VOICE · POSTING

MARKETPLACES

The B2B shelf most teams forget

AWS Marketplace · HubSpot Apps · AppExchange

Why: "does X integrate with Y?" is a buying question. Listings and integration pages answer it.

- → Complete every listing, with category terms
- → Mirror each integration with a page on your site
- → Collect reviews on the listing itself

MEASURE listings live and complete

INTEGRATION PAGES · LISTINGS

FROM ZERO TO COMPOUNDING

Your first 90 days. In this order.

DAYS 1–30

Baseline

Know where you stand, then fix the node you own.

- Build a 150-prompt set across top, mid and bottom funnel — SLATE AUTOMATES
- Track 4 engines weekly, plus your top 5 competitors — SLATE AUTOMATES
- List the 20 sources cited most in your category — SLATE AUTOMATES
- Fix pricing, definition and comparison pages — SLATE ASSISTS
- Audit schema, internal links and indexing — SLATE AUTOMATES

YOU NOW HAVE

Share of answer per engine, and a hit list of sources to win.

DAYS 31–60

Earn

Get onto the nodes engines already trust.

- Pitch the top 20 cited roundups and lists — SLATE ASSISTS
- Start a monthly customer review drive — YOUR TEAM
- Answer 5–10 community threads a week as a named person — YOUR TEAM
- Publish 1 data-led piece and turn it into posts — SLATE ASSISTS
- Turn repeat Reddit and G2 questions into pages — SLATE ASSISTS

YOU NOW HAVE

Mentions on third-party pages that AI cites for your prompts.

DAYS 61–90

Compound

Defend what you won. Expand what works.

- Refresh pages losing rank or citations — SLATE AUTOMATES
- Add prompts for new personas and regions — SLATE AUTOMATES
- Film the top 5 sales questions, then write them up — YOUR TEAM
- Complete marketplace and integration listings — YOUR TEAM
- Weekly exec report: share of answer vs competitors — SLATE AUTOMATES

YOU NOW HAVE

A weekly loop, and proof the exec team can read.

AUTOMATE THE GRIND, KEEP THE TRUST WORK HUMAN

What to hand to AI.
What to keep human.

THE WORK	SLATE AUTOMATES	SLATE ASSISTS	YOUR TEAM
Track prompts across AI engines ChatGPT · Perplexity · AI Overviews · AI Mode (+ Claude, Gemini)	●	–	–
See which sources get cited, and for whom	●	–	–
Watch competitors' visibility and content	●	–	–
Site audits, schema, internal links	●	–	–
Refresh decaying pages you approve before anything ships	●	–	–
Briefs, drafts, visuals for new pages	–	○	–
Find and pitch roundups AI cites email and LinkedIn outreach	–	○	–
Reddit and G2 research	●	–	–
Social post drafts and repurposing	–	○	–
Posting in communities, asking for reviews	–	–	●
Press, Wikipedia, video production	–	–	●
Weekly report to the exec team	●	–	–

Rule of thumb: automate tracking and production. Keep anything that needs trust human.

DO THESE THIS WEEK

Five moves.
No tool required.

- [ ] **Write down 25 questions your buyers ask**
  Pull them from sales calls, not keyword tools.
- [ ] **Ask each one in ChatGPT, Perplexity and Google**
  Note who gets named and which pages get cited.
- [ ] **Make your pricing page public and readable**
  Plan names and prices in text, not just images.
- [ ] **Pick the 3 most-cited roundups and pitch them**
  Bring data, screenshots and pricing.
- [ ] **Ask 5 happy customers for a review this week**
  On the site your category's buyers trust most.
